

Basics of Appliqué Using Misty Fuse

MV Modern Quilt Guild Workshop

June 30, 2014 - West Tisbury Library

Misty Fuse is a fusible web with no paper backing used for appliqué. The web is very soft and flexible and can easily be sewn by hand or machine, or used for raw edge appliqué.

Supplies:

Misty Fuse - available in white, black or ultraviolet. White fuses clear, black creates a shadow effect and is good when using with fabric paint, ultraviolet is resistant to darkening when exposed to sunlight over time and fuses clear. Available from Amazon, quilting supply shops or directly from **mistyfuse.com** (the online store has the largest selection of widths and sizes.)

Nonstick pressing sheet such as a Goddess teflon sheet, June Tailor non-stick pressing sheet, or Reynolds Wrap Non-Stick Lining Paper (old name is Reynolds Parchment Paper, non-stick.). (Commercial silicone coated paper baking pan liners are cheaper than Reynolds but do **not** work as well but they don't curl up like Reynolds. I use them as my underneath-everything sheets to prevent accidents.). Goddess and Tailor sheets are reusable but you can't mark on them. Reynolds and other silicone coated parchment sheets aren't reusable but you can trace your pattern. **DO NOT use regular plain parchment paper!**

Iron - hot dry iron, do not use steam

Pressing Board - cover the surface with parchment paper in case of accidents

Quilting fabric, pattern or stencils, scissors and other standard quilting tools
